SG/COSLA DIGITAL MATURITY ASSESSMENT

STAFF SURVEY BENEFITS

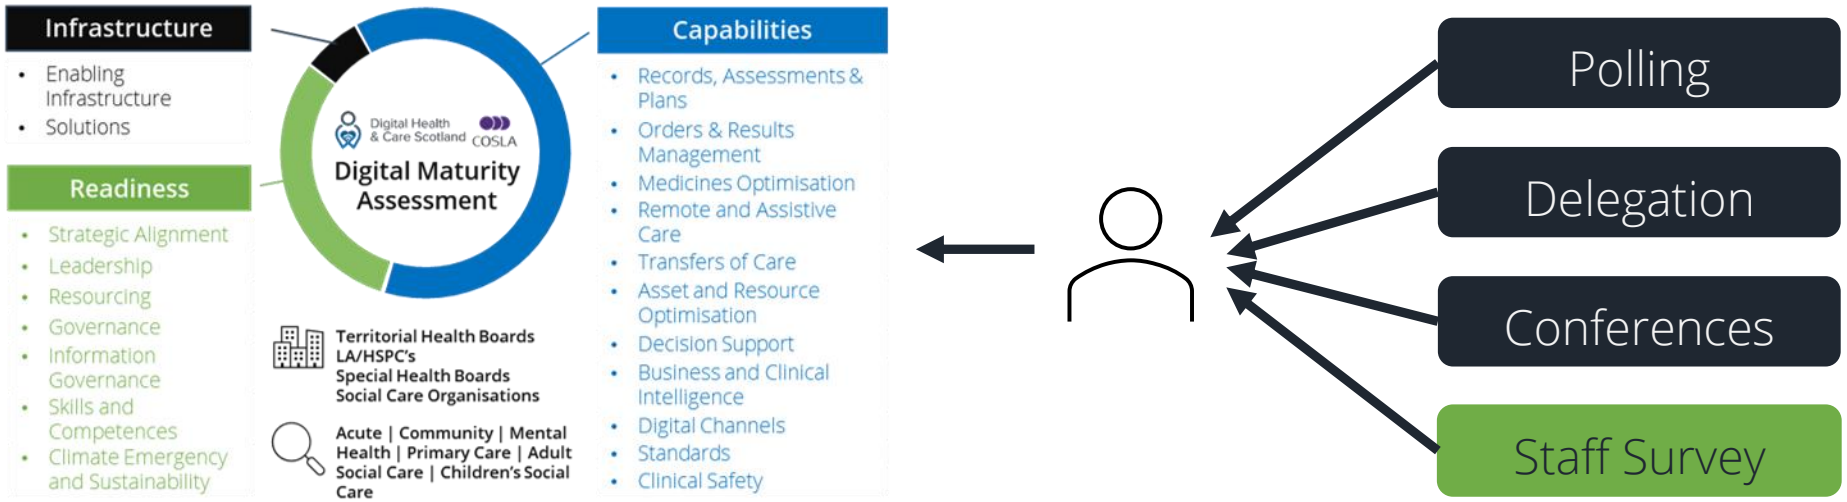
Getting the most from the workforce module

MEISTERWORKS

Background: SG/COSLA Digital Maturity Assessment

The assessment is supported by a number of collaboration options – staff survey is one of them.

Structure



Staff Survey Capabilities

The staff survey contains questions to enable several use cases. Every question is selected for relevance within each individual survey.

What can I do with the staff survey data?

Help inform your organisation's responses to the DMA

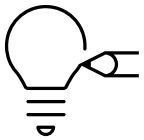
22 questions directly aligned with assessment questions (mostly reach and foundational capabilities)

Track outcomes and benefits from digital transformation

4 high-level questions developed with experts for generic benefits tracking

Understand the fundamental topology of your digital workforce

Comprehensive questions on digital life, device comfort, internet and apps, basic security at work and at home



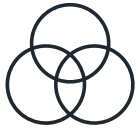
Discover actionable insights by contextualising barriers to adoption, operational consequences and the effectiveness of current approaches

Dedicated 3-tier question blocks per software/system type used at work

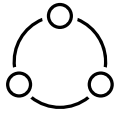
Staff Survey Best Practice

Benefits depend on having a supporting data pool; without it, some of the analytical applications discussed are unlikely to prove useful

What do I need to do?

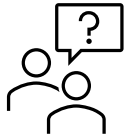


Create a large data pool that is inclusive of all staff groups and representative of your workforce



Promote completion and re-completion by staff on a regular basis

Explore the feature-rich results area of the portal, build and save views you can come back to for comparison over time



Talk to us about the goals you want to achieve, questions and ideas – we're here to help you succeed!

THANK YOU!

We are looking forward to working with you.
